Gerald W. Westerbeck
FMPC Site Manager
US Department of Energy
P.O.Box 398705
Cincinnati, OH 45239-8705

Dear Mr. Westerbeck:

The enclosed letter was transmitted to you on May 21, 1990 regarding the exchange of information between the FMPC RI/FS and the Paddys Run Road Site (PRRS) RI/FS programs. As of this date, we have not received a response designating a contact person with DOE or its contractors with whom to effectuate this exchange.

ASI collected several duplicate samples during the PRRS first round of ground water sampling and obtained samples from approximately 12 PRRS piezometer wells for uranium content analysis since our May 21st letter. The availability of the analytical results from the samples taken would greatly assist the PRRS in program planning.

I would like to take this opportunity to express our sincere appreciation for the timely assistance provided by ASI personnel in accessing FMPC RI monitor wells for sampling and water level surveys.

Please contact me at (804) 550-4740 so that we may progress this mutually beneficial exchange program.

Very truly yours,

Grove L. Higgins, Jr. /alp
